

PEXEBEL

I. INTRODUCTION

Pexebel is a mythical meme coin project resurrecting the lost kingdom of Xebel through the lens of decentralized finance.

Built as a Bitcoin Layer 2 solution, it merges legendary storytelling, meme culture, and blockchain infrastructure into one powerful meme empire.

\$PEXB isn't just a token – it's a portal into a community-driven Layer 2 civilization.

PEXEBEL

II. VISION & MISSION

VISION

To build a decentralized meme-powered Layer 2 empire on Bitcoin, uniting culture, technology, and internet-native storytelling.

MISSION

To build a decentralized meme-powered Layer 2 empire on Bitcoin, uniting culture, technology, and internet-native storytelling.

PEXEBEL

III. BITCOIN LAYER 2 WHY IT MATTERS

Bitcoin wasn't built for high-speed interactions or smart contracts. Pexebel solves that by building a Bitcoin Layer 2 using a hybrid design

- ▲ **Sidechain architecture** anchored to Bitcoin through periodic Merkle root snapshots
- ▲ **On-chain bridge** allowing BTC → \$wBTC → \$PEXB swap
- ▲ **EVM compatibility** for broad integration with dApps and tooling

This approach allows for:

- ▲ Low-cost, fast transactions
- ▲ Decentralized staking and governance
- ▲ Meme-driven on-chain incentives
